

JPC S197 / S550 Powerglide Driveshaft Loop Installation Instructions

1. Place the hoop into the driveshaft, the hoop will fit over the driveshaft yoke.
2. Remove the rear bolts for the transmission cross member.
3. Install the lower support bracket as pictured below
4. Install the 4 bolts that connect the hoop to the lower support bracket
5. Verify clearance between the driveshaft safety hoop and the driveshaft
